

CALL FOR PAPERS

Journal of Automotive Software Engineering (JASE)

Atlantis Press launches a new Open Access Journal for Automotive Software Engineering (JASE) per January 2018. JASE invites researchers and practitioners in the area of automotive software engineering to publish scientific papers in the area of automotive software engineering, including architecture, development, process, and testing. The scope is not restricted to the automotive domain, but has a strong focus or relation with it.

We are soliciting original scientific results not submitted or published elsewhere, that fit with the aims and scope of the journal. Please see <https://www.atlantispress.com/journals/jase> for more information.

The number of pages of the papers is 10 to 20.

Submission Procedure

All papers should be submitted to our electronic system at: <http://journals.sfu.ca/atlantis/index.php/jase>. If this is the first time you submit to JASE then you will have to register first and then submit your paper.

JASE requires all papers to be prepared as Word or LaTeX files as this will give the best formatting results. However, for the submission, please use a PDF version of your article.

Open Access

All articles are published as Open Access articles and are immediately available for free for any interested reader. For having an article published as an Open Access article, an Article Processing Charge (APC) of 350 euro is requested.

For more information please contact the editors-in-chief, Dr. Yanja Dajsuren, PDEng (y.dajsuren@tue.nl) and Prof. Dr. Mark G.J. van den Brand (m.g.j.v.d.brand@tue.nl).

CALL FOR PAPERS

Journal of Automotive Software Engineering (JASE)

Editorial Board

Andreas Vogelsang, Technische Universität Berlin, Germany
Christian Berger, Chalmers | University of Gothenburg, Sweden
Darko Durisic, Volvo Car Corporation, Sweden
Harald Altinger, Audi, Germany
Ina Schaefer, TU Braunschweig, Germany
Miroslaw Staron, Chalmers | University of Gothenburg, Sweden
Yaping Luo, Altran, The Netherlands
Ji Wu, Beihang University, China
S Ramesh, General Motors, USA
Simon Fürst, BMW, Germany
Alejandro Masrur Technische Univeritat Chemnitz, Germany
Naoya Ishizaki , Toyota, Japan
Emilia Silvas, TNO Automotive, The Netherlands
Hans Utz, Nissan, USA
Andreas Wortmann, RWTH, Aachen, Germany
Huascar Espinoza, CEA LIST, France
John Favaro, Intecs, Italy
Felix Töpler, TOYOTA Motorsport GmbH (TMG), Germany
